PROFESSIONAL SUMMARY

Third-year Management Information Systems undergraduate with hands-on experience turning raw business data into actionable insight including an interactive Power BI sales dashboard with custom DAX measures for growth and product ranking. Strong foundation in requirements gathering, business process modeling, and SQL, with a genuine interest in using data and systems thinking to support better business decisions. Seeking a Business Analyst Trainee, MIS Intern, or Data Analyst Intern role to apply and grow these skills.

CORE COMPETENCIES

Requirements Gathering • Data Analysis • Business Process Modeling • Power BI & DAX • SQL • Stakeholder Communication

EDUCATION

Bachelor of Science (Hons) in Management Information Systems (Special) 2024 – Present (Expected 2027)

NSBM Green University

G.C.E. Advanced Level (A/L) Commerce Stream (1C, 3S) 2021

G.C.E. Ordinary Level (O/L) (3A, 2B, 4C) 2018

PROJECT

I.N Electronics — Sales Performance Dashboard

Power BI | Excel | DAX

- Built an interactive dashboard analyzing sales, profit, and product performance across the business.
- Created custom DAX measures to track sales growth and rank product performance.

GitHub: github.com/ifas777/IN-Electronics-Sales-Performance-Dashboard

Smart Queue Management System (Group Project — Team Lead)

Flutter | Mobile App Development

- Led a team to design and build a mobile queue management app to reduce physical waiting times.
- Coordinated development tasks across the team and oversaw the overall app architecture.

Expense Tracker (Group Project)

Java | MySQL

- Designed the MySQL database schema for a daily expense tracking application aimed at reducing unnecessary spending.
- Structured tables and relationships to support expense logging, categorization, and spend analysis.

CERTIFICATIONS

Power BI for Beginners 2026

Simplilearn SkillUp (Microsoft Course)

- Built dashboards and applied core data visualization principles for business reporting.

Business Analytics with Excel 2026

Simplilearn SkillUp (Microsoft Course)

- Applied Excel-based analysis techniques to business reporting and decision-making scenarios.

TECHNICAL SKILLS
